VIMP documentation

Table of contents:

Activating your VIMP installation

This guide will give a short introduction to the VIMP portal for the initial use after a fully new VIMP installation and aims to describe the most relevant functions and features that can be helpful for the first use.

> ⚠ **VIMP ENTERPRISE AND CAMPUS ONLY**
>
> If you're using VIMP Enterprise or VIMP Campus, your VIMP platform is deactivated after installation initially and has to be activated by entering a valid license key in the administration panel.

Therefore, please browse to the administration panel first:

https://www.YourDomain.com/backend.php (replace www.YourDomain.com with the real web address used for the VIMP installation).

The following users are set up initially for the first use:

USERNAME	PASSWORD
admin	admin
moderator	moderator
user	user

To access the administration panel please log in with the user "admin", since this is the only user with administration rights by default.

> ⚠ **VIMP ENTERPRISE AND CAMPUS ONLY**
>
> After successful login, please click on **Configuration** in the top link bar. This is the main configuration page of your portal and will be addressed more

often in this guide.

Click on the **Basic settings** and enter the license key which you have received from your VIMP contact in the **License Key** option. In case you did not receive a license key yet, please contact the VIMP sales team at info@vimp.com.

Once the license key has been entered correctly, the portal will be activated, and you can start using it henceforth.
